Company description :

Nokia Solutions and Networks is the world's specialist in mobile broadband. From the first ever call on GSM, to the first call on LTE, we operate at the forefront of each generation of mobile technology. Our global experts invent the new capabilities our customers need in their networks. We provide the world's most efficient mobile networks, the intelligence to maximize the value of those networks, and the services to make it all work seamlessly.

Job description :

Professional challenges and career opportunities:

We are looking for a talented individual to join one of our departments as Working Student/Technical Editor within the Customer Documentation team.

Position Description:

Joining the Customer Documentation team in Wrocław, you will have a unique opportunity to create Web applications that improve and automate the content creation process. The results of your work will be experienced in various Nokia organizations. A wide range of running projects allows you to be involved in those that suit you best. You will learn how to build a UX based on user needs and expectations.

You will also learn how to create user manuals, guidelines, and descriptions in cooperation with Technical Writers and Multimedia Designers. You will have a chance to become a technical communication expert.

Required profile :

Position Requirements:

- * Student or Graduate of a University of Technology
- * Knowledge of cross browser HTML/HTML5, CSS3, JavaScript
- * Experience in Photoshop, Edge Animate, Captivate, or Blender
- * Fluent in spoken and written English
- * Basic understanding of mobile (3G/4G) radio access technologies
- * Interest to develop competence within the telecommunications system
