**Company description :**

Nokia invests in technologies important in a world where billions of devices are connected. We are focused on three businesses: network infrastructure software, hardware and services, which we offer through Nokia Networks; location intelligence, which we provide through HERE; and advanced technology development and licensing, which we pursue through Nokia Technologies. Each of these businesses is a leader in its respective field.

Our Nokia Networks business is the world's specialist in mobile broadband. From the first ever call on GSM, to the first call on LTE, we operate at the forefront of each generation of mobile technology. Our global experts invent the new capabilities our customers need in their networks. We provide the world's most efficient mobile networks, the intelligence to maximize the value of those networks, and the services to make it all work seamlessly.

Nokia European Software Engineering Center hires dedicated, enthusiastic and passionate people, who create the largest ITC R in Poland. Our facilities in Wrocław are located in three sites and accommodate one of the biggest test telecommunications labs in Middle and Eastern Europe. Apply and experience the adventure of a lifetime!!!

**Job description :**

We are looking for motivated software professionals for Junior C++ Software Engineer positions. The challenges you will face include support of various software specification, developing, maintaining and testing processes.

We have a variety of opened positions for candidates with wide range of work experience - from fresh graduates to highly experienced professionals. You have to remember that the more experienced you are, the greater opportunities you have.

You will take part in a development of our own Linux distribution running on a Base Transceiver Station for mobile networks.

**Required profile :**
