Company description :

EUROCONTROL, the European Organisation for the Safety of Air Navigation, is an intergovernmental Organisation with 41 Member States, committed to building, together with its partners, a Single European Sky that will deliver the air traffic management performance required for the 21st century and beyond. We help our Member States to run safe, efficient and environmentally-friendly air traffic operations.

Job description :

The trainee will be part of the Navigation and CNS Research team, contributing to a wide range of ATM navigation activities. This is an ideal opportunity for someone interested in developing or furthering their knowledge of navigation practises in a multicultural and multilingual environment. S/he will be tasked to Provide data analysis and software testing, support to navigation infrastructure topics, including both terrestrial and satellite navigation.

Required profile :

- * Already holding or about to obtain a university degree in electrical or software engineering.
- * A mathematical background would be an advantage.
- * Basic knowledge of conventional and satellite based navigation.
- * Understanding of radio propagation would be an advantage.
- * An interest in aviation and in particular in the navigation domain would be beneficial
