Company description :

Nokia invests in technologies important in a world where billions of devices are connected. We are focused on three businesses: network infrastructure software, hardware and services, which we offer through Nokia Networks; location intelligence, which we provide through HERE; and advanced technology development and licensing, which we pursue through Nokia Technologies. Each of these businesses is a leader in its respective field.

Our Nokia Networks business is the world's specialist in mobile broadband. From the first ever call on GSM, to the first call on LTE, we operate at the forefront of each generation of mobile technology. Our global experts invent the new capabilities our customers need in their networks. We provide the world's most efficient mobile networks, the intelligence to maximize the value of those networks, and the services to make it all work seamlessly.

Nokia European Software Engineering Center hires dedicated, enthusiastic and passionate people, who create the largest ITC R in Poland. Our facilities in Wrocław are located in three sites and accommodate one of the biggest test telecommunications labs in Middle and Eastern Europe. Apply and experience the adventure of a lifetime!!!

Professional challenges and career opportunities:

We can say a lot about NOKIA and it's accomplishments, but what is the point? Important question is when we can get with you on board? If you're passionate in mobile telecommunication and you also want to know the answer - contact with us! What we can guarantee is competitive salary, work in extraordinary team, excellent social package and much, much more. In exchange we'd like you to share your commitment and experience..

Job description :

Position Description:

Our team is looking for talented Customer Support Working Students to join our technical team and build the outstanding customer support. You will be joining other extremely-passionate engineers that share a common interest in UNIX/Linux, cloud systems, virtualizations and solving problems with software and data.

Required profile :

Position Requirements:

- * Good Knowledge of system administration in Red Hat/ Linux or other UNIX systems
- * Knowledge of system administration in Windows Servers
- * Basic knowledge of Telecommunication Technologies (GSM, UMTS, LTE, practical understanding of TCP/IP and transport network)
- * Database (Oracle) administrator skills
- * Very good knowledge of English (both spoken and written)
- * Programming background
- * Don't have experience in something listed? We don't mind if you're a quick study
- * Don't see a technology you love? Tell us why we should know about it

Bonus points:

- * Cloud solutions knowledge
- * Customer Service Support experience
- * Advanced knowledge of Databases (Oracle/SQL)
- * Basic experience in system virtualization
- * Basic programming skills with script languages (e.g. Perl, Unix shell, Python)
- * Basic software development background with object-oriented languages
- * Knowledge of technologies like e.g.: XML, XSLT, JavaScript, CSS, HTML, Web Services
