Company description :
Nokia invests in technologies important in a world where billions of devices are connected. We are focused on three businesses: network infrastructure software, hardware and services, which we offer through Nokia Networks; location intelligence, which we provide through HERE; and advanced technology development and licensing, which we pursue through Nokia Technologies. Each of these businesses is a leader in its respective field.

Our Nokia Networks business is the world's specialist in mobile broadband. From the first ever call on GSM, to the first call on LTE, we operate at the forefront of each generation of mobile technology. Our global experts invent the new capabilities our customers need in their networks. We provide the world's most efficient mobile networks, the intelligence to maximize the value of those networks, and the services to make it all work seamlessly.

Nokia European Software Engineering Center hires dedicated, enthusiastic and passionate people, who create the largest ITC R in Poland. Our facilities in Wroclaw are located in three sites and accommodate one of the biggest test telecommunications labs in Middle and Eastern Europe. Apply and experience the adventure of a lifetime!!!

Job description :
HetRan is looking for a JavaScript developer who has excellent understanding/experience wit HTTP/JavaScript/HTML/CSS. Here you will be developing a web interface, server side application for the company's flagship network devices. It is opportunity to develop and test backend application in Node.js. You will be a member of scrum team consisting of programmers, tester and specificators. The team applies good development practices, is responsible for requirements analysis, test cases design, implementation and execution. You will have an opportunity to constantly develop your skills in IT and Telecommunications domains. You will work in a flexible and friendly multicultural environment. Our road to RAN cloud and 5G has been started already!

Required profile :
Requirements:

* Excellent understanding/experience with HTTP/JavaScript/HTML/CSS
* Experience with common JavaScript libraries/frameworks (jQuery, Angular, Bootstrap, Node, etc.)
* Extensive experience with Linux OS (command line) and bash
* Good communication in English
* Readiness to relocate to Wroclaw

Bonus points:
* SW development methodologies (Agile, SCRUM)
* Cellular and broadband 3G or 4G access technologies (UMTS, LTE)
* Professional work experience in above areas will be seen as a major advantage
